Projects

Minor Project

Project Title: College Record Management

Languages used: C++

Contribution: Development and Presentation

Description: It avoids paper work in colleges/universities and keeping the record safe from any damage. It also made the searching and managing of records easy.

Major Project

Project Title: Attendance Mainframe Platform

Languages Used: PHP, MySQLi, HTML, CSS, jQuery

Contribution: Development and Presentation

Description: This project made it easy to take and manage students/teachers/employee attendance in colleges/universities/companies.

Other Projects:

- **Paytoll** An advance toll payment solution. Finalist in **SMART INDIA HACKATHON 2017**.
- **Jigsaw Pictures** Website and admin panel development for a production house that directed many famous movies like Jolly LLB, Girliyapa and others.
- **GetOurContractor** Website development for a Delhi based start-up. It consists of 3 panels (for customer, merchant, & admin); with the implementation for payment gateway, Google locations. An upcoming version contains SMS OTP with SMS updates.
- **Stuff How to** A blogging platform similar to wordpress.com and blogger.com
- **Acemblem Framework A** CSS based framework developed for my personal development.
- **Acemblem CMS** A PHP based CMS for my personal web applications development.

I also worked with some other small business to manage and develop their services online.

Beside these, I designed and developed couple of lead landing pages (out of them, some are live on the internet and some rest inside my working laptop).

Interests and Activities

Indoor-activities like surf the Internet, watching movies, playing computer games

Outdoor-activities like football, basketball, cricket

Declaration

I hereby declare that the above details furnished by me are true.
